

S2 TP English Booklet 2/2

IUT GMP 2025/2026 Aeronautics & Renewable Energies

English Dept. Office n° 410

Student's name & group: _____

Teachers' contact details: keda-cherry.tree@iut-tlse3.fr
richard.goldsmith@iut-tlse3.fr
irina.rigaudie@iut-tlse3.fr (Course Coordinator)

Evaluation S2

- 30 % AVIATION & AERONAUTICS WORKSHOP
- **30% RENEWABLE ENERGIES**
- 30% Final Exam on S2 topics
- 10% CRIL
- UP TO 2pts BONUS TO YOUR FINAL TD GRADE FOR PERSONAL WORK*

+ ACTIVITIES IN ENGLISH

FOR SAE 2.4 ➡ 15%

5TD & 8TP sessions of 1,5 hours

- **Module 1 – Aviation & Aeronautics (5 TD before WEEK 15)** BOOKLET 1/2

DELIVRABLE 1: An individual 90-second SCIENCE PITCH (20%)

DELIVRABLE 2 : A 10-min group INTERACTIVE ACTIVITY (10%)

DELIVRABLE 3 : A 15-min test based on your INTERACTIVE ACTIVITIES (10%)

TOPICS

AIRCRAFT & FUSELAGE, AERODYNAMIC FORCES & WINGS, STABILITY, CONTROL & MANOEUVRES, ENGINES & ENERGY, AIRCRAFT SYSTEMS & AVIONICS

Vocab & Grammar preparation for test & final exam

- **Module 2- Renewable Energies (8 TP WEEKS 15-24)** BOOKLET 2/2

The World's Turning point SUMMIT – Proposition of policy SPEECH

Vocab & Grammar preparation for the final exam

- **Appendices (guidelines and practice)** BOOKLET 1/2

Additional documents on aeronautics, Grammar & Language Focus, Self-evaluation tests and exercises, Phonetics, Enriching your Work, Aeronautical Vocabulary

***YOU CHOOSE : CHAPTER REVIEW QUESTIONS, DOC 1 & DOC 2, APPENDICES 1 & 2 BEFORE WEEK 20 @ OFFICE 410 or on MOODLE AS A SINGLE FILE**

Module II

In Module II of the English **S2** course, you will use *the Renewable Energies Brochure (p.4)* to produce :

✧ **A 1-page individual Fact File** using data-storytelling – *an individual grade*
to consolidate your role

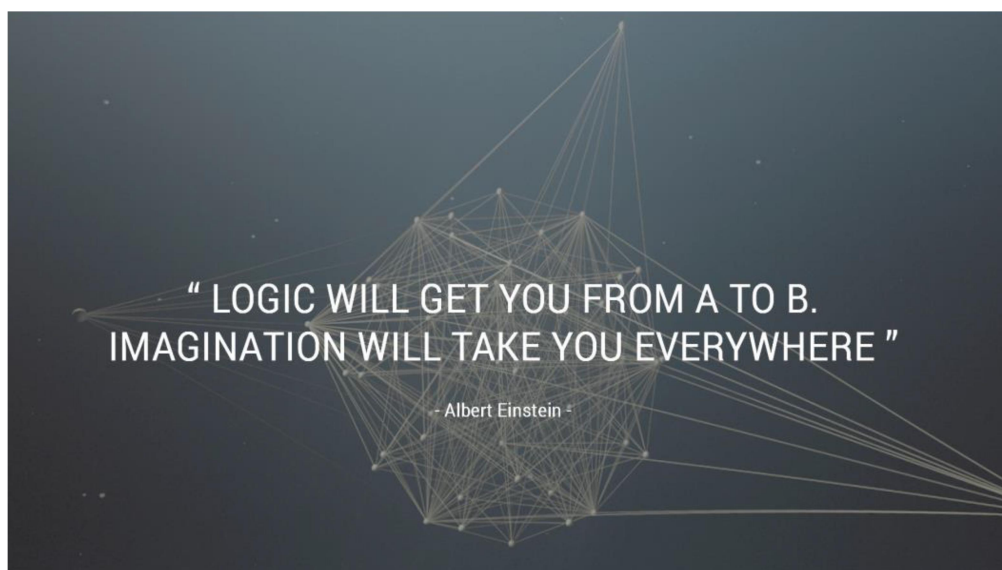

(TP 5/6 in class & on Moodle)

✧ **A team's speech draft** – ***to work as a team*** on the scenario
and propose solutions and a plan of action *a pass*

(TP 7 in class & on Moodle)

✧ **A team speech (180"/student)** – ***to act as a delegation***
during **the Turning Point Summit event** *individual & group grade*

(final class)

The Brochure Contents

TP 1-2/ STARTER ACTIVITIES

- STARTER ACTIVITY** pp. 5-6
- THE WORLD'S TURNING POINT SCENARIO** pp. 7-8
- ROLES** pp. 9-11
- SCHEDULE & EVALUATION** p. 12

TP 2-3/ UNDERSTAND

- CONTEXT** pp. 13-19

TP 3-5/ INFO SEARCH

- MAPS & COUNTRIES** p. 20
- SOURCES OF INFORMATION** pp. 21-24

TP 5-6/ PREPARE

- DATA-STORYTELLING & FACT FILE** pp. 25-26
- RHETORICS** pp. 27-28
- A PROPOSITION OF POLICY SPEECH** pp. 29-32

TP 7/ PRACTICE

- SPEECH DRAFT** pp. 33-34

TP 8/ PERFORM

- EXTEMPORANEOUS DELIVERY** pp. 35-36

PAIR WORK : STARTER ACTIVITY

« Around the world renewable energy use is **on the rise** »

Role A :

naturally maintenance decrease run out consumed lower wind
generated stable facilities greenhouse gas emissions. climate change
reliable fastest hold the key threats biomass manufacturing parts
benefits operation

Role B :

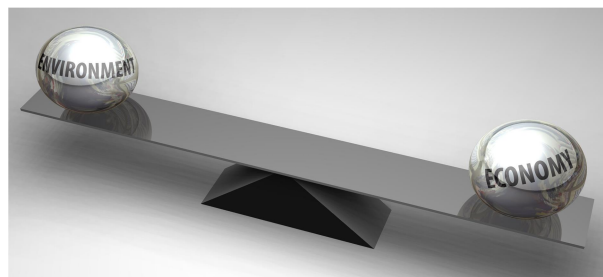

migration patterns generate power downsides run out disrupt wildlife
alternative within our reach affordable dams greenhouse gas
costly geothermal wind efficient intermittent biomass
replenish environmentally wind farms fossil fuels

1. Watch videos A or B, use the vocabulary above to note key facts & beliefs about RE. Which beliefs do you (dis)agree with?

FACTS

BELIEFS

2. Roles A & B come together to discuss opinions on energy transition. Give 3 examples of opinions based on facts or on beliefs.
3. Practice making predictions about the future scenarios of the energy transition.

Basic concepts

We use **ten** major sources of energy in France.

Energy is used for **transportation, heating, cooking, manufacturing, and making electricity.**

Some energy sources are **non-renewable**; others are **renewable**.

Some energy sources affect the **environment** more than others.

Some energy sources provide **a lot** of the energy; others provide only **a small amount**.

Some energy sources provide energy **at a low cost**; others are more **expensive**.

Some energy sources provide energy **continuously**, others intermittently and are less **reliable**.

LANGUAGE FOCUS :

Will, May, Might

HOW TO MAKE PREDICTIONS?

👁 Study these examples:

*Advanced safety vehicles (ASVs) **will** be much safer.*

*The car of the future **might** be electric.*

*Hydrogen fuel cells **may** be the long-term answer.*

When we're talking about future developments, we use **will** for things which are **certain**. We use **may and might** for things which are **possible**. (There is little difference between may and might).

✋ In spoken English:

won't = will not

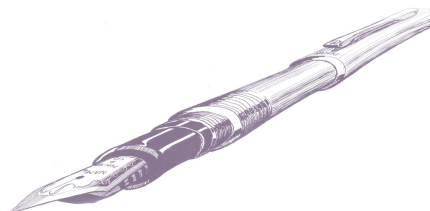

mighn't = might not

Task 1 : Complete the sentences using will, may / might, or their negative forms. The phrases in brackets will help.

- 1 We ----- use petrol engines in the future. There are better alternatives. (I'm certain.)
- 2 Hydrogen fuel cells ----- get cheaper as technology improves. (I'm certain.)
- 3 A hybrid car ----- be the best choice. It doesn't produce much pollution. (It's possible.)
- 4 Solar -powered vehicles ----- be the answer to work by train than by car. (It's possible.)
- 5 Cars ----- become much safer with the addition of many sensors. (I'm certain.)
- 6 By 2015 more people in Europe ----- travel to work by train than by car. (It's possible.)
- 7 As world oil supplies dry up, petrol ----- get more and more expensive. (I'm certain.)
- 8 Because hydrogen-fuelled cars are silent, they ----- be more dangerous than cars with petrol engines. (It's possible.)

Task 2 : Make your own predictions about the topics below for ten years into the future. Then compare your predictions with your partner. Try to reach agreement.

- The number of cars in your country
- The price of oil
- Recycling car parts
- The most popular way to travel to work
- The use of electric cars

The World's Turning Point

SCENARIO

You are in 2040 near the end of the 'the Disastrous Decade', the years 2030 – 2040.

Ten years of wars, epidemics, radical climate change and economic turmoil. Here is a quick rundown on the history of the period 2030 – 2040, there have been:

- two successive pandemics, Ebolo 2035, and Antarx 39 – this last epidemic was due to reactivated bacteria from melting ice in Antarctica and Amvank mining prospection. As an example of the epidemics' consequences, the former American population has passed from 331 million to 250 million ;
- inter-continental wars broke out in 2031 because of a rise in Nationalist political entities, climatic changes, population movements because of conflict, fresh-water and food scarcity as well as unstable dictatorships. Each continent knew this problem at the same time but not for the same reasons. The wars finished five years ago. Today everybody is talking reconstruction for a better new world ;
- a sudden rise in ocean levels and severe climate changes have modified the contours of the land continents. After climate change slowed down in the period 2030 – 2035, climate change has since quickened beyond belief with disastrous effects on sea levels (see map 1, p. 16)

The World has radically changed over the past ten years. There are now 4 new superpowers. The time has come for energy independence in every region of the World which is the sole key to future peace, stability and prosperity...

The 4 **new** superpowers must now negotiate with each other to find a consensus. All agree that future conflicts would be too expensive and many governments fear the return of a mutant variant of Antarx 39. Climate change threatens more every day, renewable energies are the 'ONLY' solution...but can all the superpowers agree on a common treaty similar to the **FAT** - "the **F**resh **A**ir **T**reaty"?

International negotiations are due to begin in seven weeks and you have been chosen to represent ***the CFS, Amvank, the Zhù Empire or the AGAFAM Alliance***. You are to give an opening speech - 'Proposition of Policy' speech - at the International Summit – **the 2040 TURNING POINT SUMMIT**.

You are going to present the interests of the political entity in a speech based on a PESTLE study. You are going to write and then speak about your future propositions for renewable energies in a 5-year plan. This plan must include propositions for the CFS, Amvank, the AGAFAM Alliance, the Zhù Empire and the 'Forgotten' States and the 'Forbidden' Territories, which are not represented in the summit. Each party must propose a plan with 'give and take' propositions for themselves and the others. In other words, each party must be flexible but show a strong attitude without losing face.

Your government has given strategic information to your group and has high hopes in your ability to defend your country's politics and interests while gaining full access to renewable energy technology.

« There is no one future just as there is no one present »

GOVERNMENT DELEGATION ROLES

Each summit delegation will include:

1. the Renewable energies expert
2. the International (geo)politics expert
3. the Climate change expert
4. the Strategist (the leader, the group facilitator)
5. the Communication expert

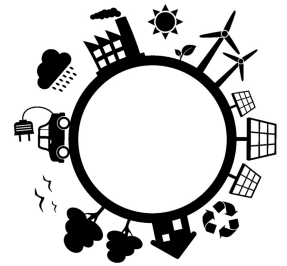

*"You can't change your
past but you can
always change your
future"*

Each expert will have their word to say during the Turning Point Summit.

Renewable energies expert

This is **problems & solutions** expert. The **RE expert** understands the underlying engineering principles & technologies behind the generation and storage of different types of alternative energies. Are renewable energies really clean energies and a viable, realistic alternative to the fossil fuels? Will the government be willing to invest and subsidize the emerging industry? Facts & figures from trustworthy sources are his/her persuasion tool. The **RE expert** works closely with the **Climate change expert**.

International (geo)politics expert

This is **spaces & regions** expert. The **International (geo)politics expert** monitors interests & ambitions of other superpowers to understand what their possible plan of action could be in order to formulate business/technological proposals to foster mutual cooperation and understanding between the superpowers and curb domination and expansionism tendencies. This expert works closely with the **Strategist**.

Climate change expert

From polar bears in the Arctic to turtles off the coast of Indonesia, the survival of much life on Earth is at risk from the changing climate. Irregular climate patterns *El Niño* and *La Niña* disrupt wildlife migrations, reproductive behaviour of many species and result in ocean levels rising. The **climate change expert** is **causes & effects** expert who can help navigate the new landscapes & geographies, minimize risks & maximize country's growth. He/she works closely with the **International (geo)politics expert**, the **RE expert** and the **Strategist** as climate change offers new opportunities for producing renewable energies.

Strategist aka Facilitator aka Leader

The **Strategist** uses their analytical skills to evaluate and organize the team's ideas and skills into an effective strategy & plan of action. After studying and assessing the scenario and the goals, he/she makes suggestions to foster and encourage cooperation strategy with the other delegations. The Strategist works closely with the whole team and knows how to appeal to their hearts and minds to take the team's performance to the next level.

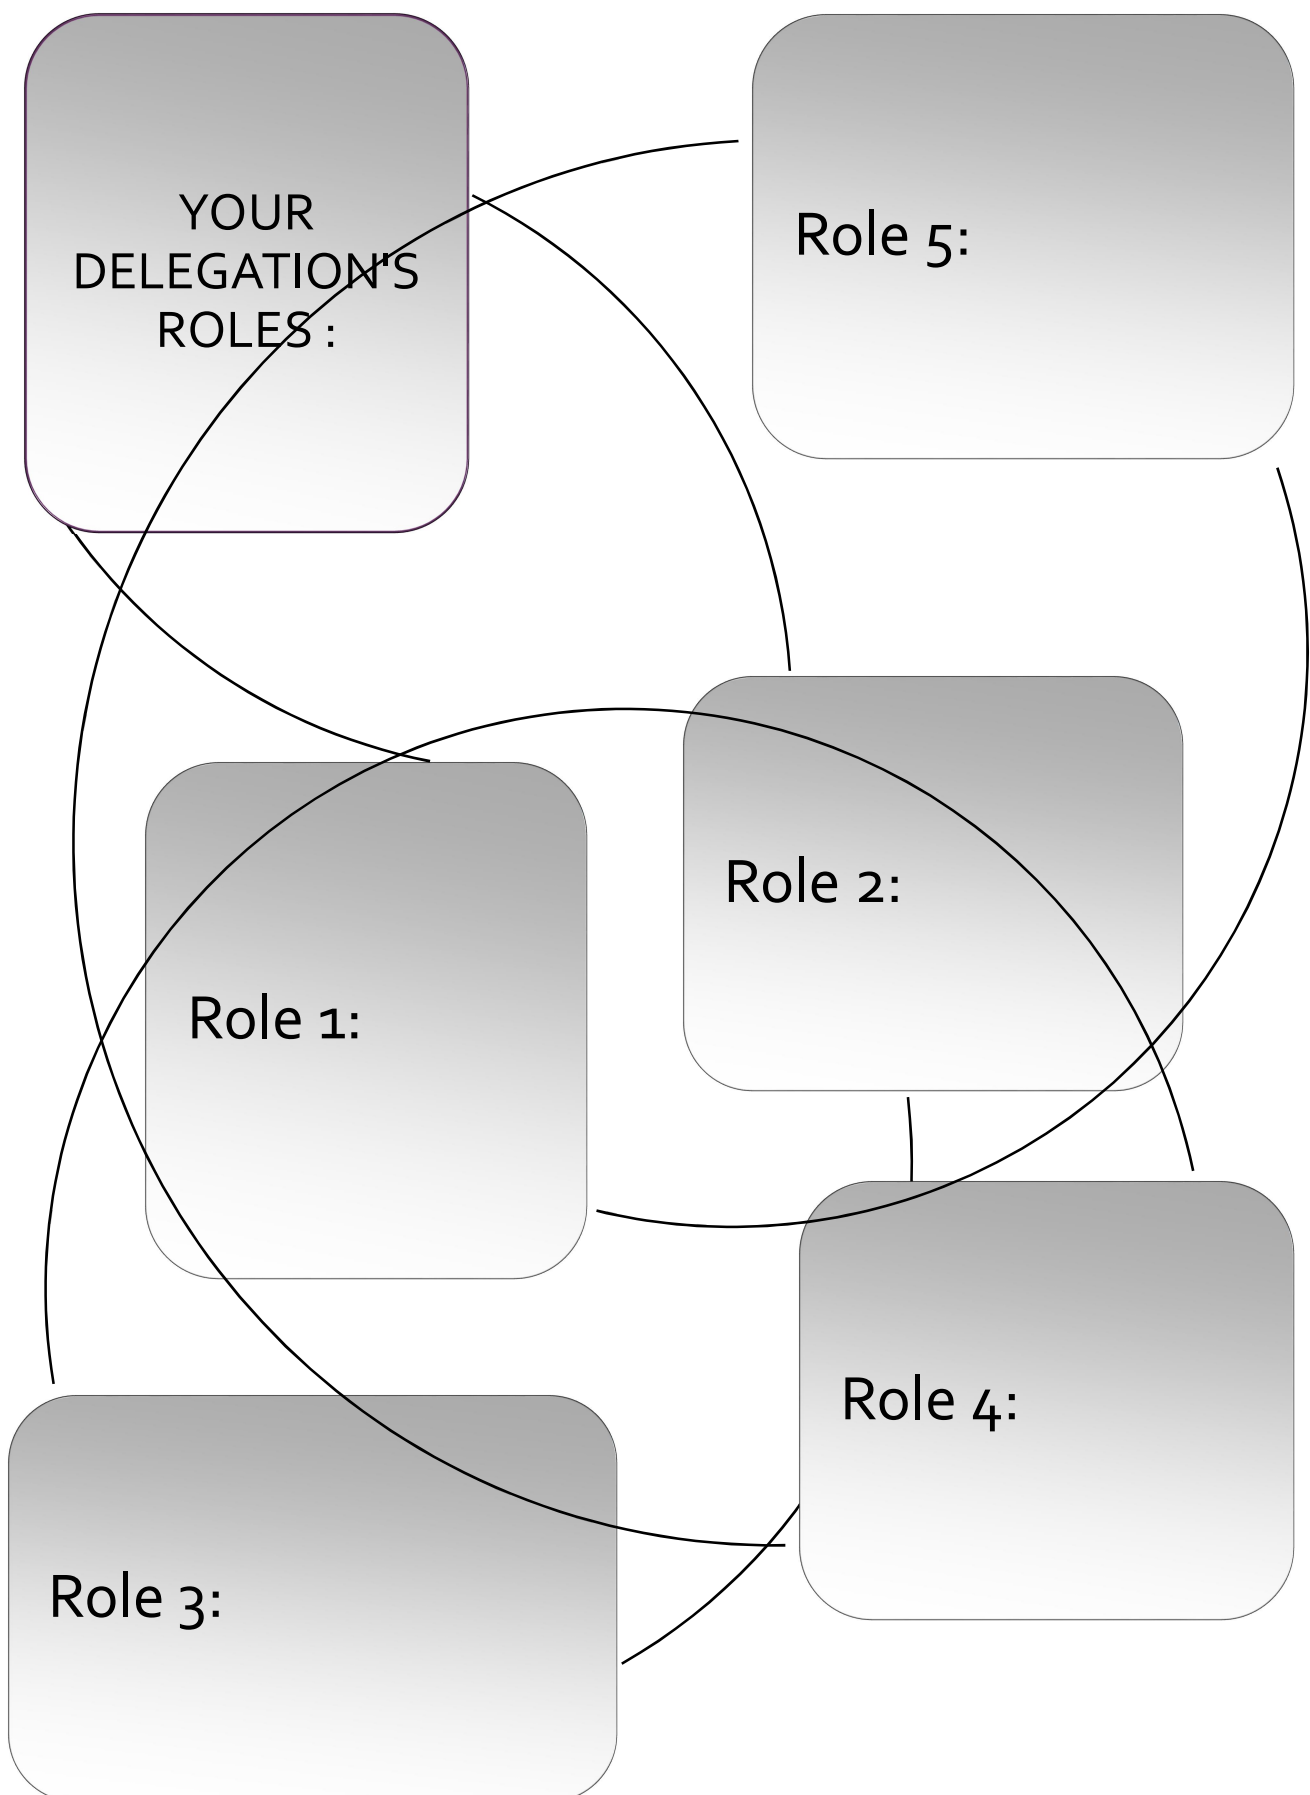

Communication expert

The **Communication expert** helps the delegation craft convincing and effective message, both to the Summit participants and to the humanity as a whole. Without such a professional on their side, delegations risk communication failures that can compromise the successful outcome of the Summit and damage the delegations' reputation and efficiency. This is **structure & order** expert, who encourages members to express themselves, takes everybody's point of view to shape group's ideas into an effective speech outline for the Summit.

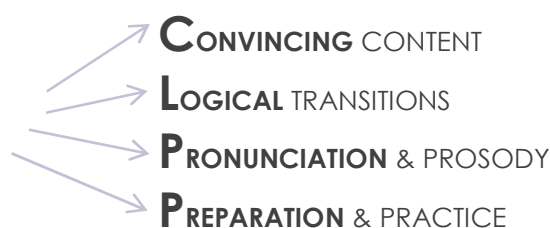

Task 1.1 Your group's organigram. Write a name and a role.

WORK SCHEDULE

EACH STUDENT HAS 3 MINUTES TO SHOWCASE

TP 8 – PERFORM THE SPEECH – THE ‘DELIVERY’ FOLLOWED BY A MINI- DEBATE

TP 7 – FINALISE & SUBMIT THE SPEECH & PRACTICE DELIVERY (PROSODY – PERSUASION & EXTEMPORANEOUS)

TP 6-7 PLAN & PREPARE THE SPEECH (RHETORICS 2/2)

TP 5-6 – DATA STORYTELLING - FACT FILES (RHETORICS 1/2)

TP 3-4 – GROUPS DO : INFO SEARCH – NOTE TAKING. EACH EXPERT PREPARES & SUBMITS A FACT FILE ON THEIR ROLE **BEFORE TP 5**

TP 2 – UNDERSTAND THE CONTEXT, THE GOAL, THE METHODOLOGY & THE DELIVERABLES

a – READ THE SCENARIO INDIVIDUALLY. TAKE NOTES.

b - ALL THE EXPERTS COME TOGETHER TO ASSIGN THEIR ROLES & DISCUSS THE PROJECT AND COMPLETE THE MAPS

PROPOSITION OF POLICY SPEECH - *Evaluation grid*

POINTS	A1 <i>lacking</i>	A2 <i>basic</i>	B1 <i>meets expectations</i>	B2+ <i>exceeds expectations</i>
	1 pt	1.5pts	2.5pts	3-5 pts
Pronunciation	<i>difficult to understand</i>	<i>interfering accent</i>	<i>understandable accent</i>	<i>clear/correct or 'near native'</i>
Fluency	<i>too slow/broken</i>	<i>efforts</i>	<i>emerging</i>	<i>comfortable or acquired</i>
Prep & delivery	<i>reading from paper</i>	<i>some reading</i>	<i>speaking (efforts)</i>	<i>enthusiasm/engaging</i>

☐ -0.5 pt per a mispronounced topical word ☐ -1 pt if over/under 3-min time limit ☐ +0.5 pt/per a rhetorical device ☐ +0.5 pt /per a reporting verb				
Group bonus/malus :				
☐ +0.5 pt if strong opening ☐ +0.5 pt if strong closing ☐ - 2 pts if lacking group cohesion				GRADE /20

CONTEXT

the New Political World Order

The CONFEDERATION OF FREE STATES (the CFS), this

includes most of Europe and Russia as far as Moscow. 900 km east of Moscow there is a North-South border that separates the Forbidden North Territory from the Zhù Empire and the CFS. The Inter-continental Wars have allowed the emergence of peace in these regions but has had a huge toll on foreign investments and infrastructures. England, Ireland, Holland and especially Denmark in 2030, have finally disappeared under the North Atlantic due higher sea-levels. Greenland, which was governed by Denmark has been invaded and is part of Amvank. The CFS needs important investments from other states but is opposed to fossil and nuclear energies and AI hacktivists. However, it will negotiate with dictatorships depending on what is at stake.

On a brighter side, 80% of the ground-breaking technology in renewable and technological services are invented in the Confederation of Free States (CFS). These technologies have greatly improved in the last decade because of scientific discoveries during the wars. The CFS has also realized that the AGAFAM ALLIANCE are spying on its recent renewable energy technologies. As stated, the CFS needs funding for its brand-new renewable energy projects that it would like to set up worldwide, especially in sub-Saharan states and in the Forbidden South Territory. The Forbidden South Territory was formerly known as Australia, its borders have been closed since the Antarx 2029 epidemic. The CFS is interested in setting-up a gigantic sun farm and exploiting free energy there, selling it to other neighbour states.

The AGAFAM Alliance vs. Amvank

The USA no longer exists, after The Columbus War in 2035 – 2038, two new countries have been created – Amvank and the AGAFAM Alliance. Let's have a historical reminder for those who have forgotten past issues or who weren't able to follow Internet during the Inter-continental Wars. The first country created was Amvank, named after its founder, Her Supreme Royal Highness Ivanka TRUMP. The

Columbus War began after the US invaded the orphan territory of Greenland for oil extraction. Canada, California and several other US states were opposed to the invasion. Canada and the GAFAM companies helped the rebel states to secede or 'break free' from the United States of America. To put an end to the Columbus War, the states of Washington, Oregon, California, Arizona and New Mexico were bought by the GAFAM companies from HSRH Ivanka Trump in December 2028.

In exchange Amvank's claims on Greenland were accepted by the GAFAMs and Canada. As you may remember at the time, HSRH Ivanka TRUMP stated when talking about the GAFAM rebel states, *"I didn't like those States anyway, too hot, too sunny and too windy!"* Thanks to the peace treaty with the GAFAMs, Amvank now has the funds to continue oil, gold, rare metal and uranium extraction in Greenland. Amvank has become specialized in producing raw materials and now dreams of setting up mining and oil extraction in Antarctica.

The GAFAM companies, who have since gained enormous power, have merged with Canada to become one political state entity – the Autonomous GAFAM Republic, or the AGAFAM Alliance. The country lacks a solid educated workforce but has an elite dedicated exclusively to AI technology, therefore lacking the necessary technology for efficient renewable energies. The other major problem is a lack of water reserves and severe droughts.

The Zhù Empire, the World's economy is mainly organized in Asia where 75% of all funding for projects comes

regions of their Empire.

from. Like the former USA, China has been through internal and regional clashes with its neighbours, the ZHÙ Empire has emerged. China, Japan and India form the Zhù Empire. It would like to exploit resources in the former region of Siberia now called the 'Forbidden North Territory'. Desperately in need of technical advances in renewable energies, it remains the workshop of the World and can offer great possibilities if commercial ties are put into place. The population is strictly controlled by AI and facial recognition. The Zhù Empire considers most countries in south-east Asia as being future

The 'Forgotten States', a last word on South America, sub-Saharan Africa and

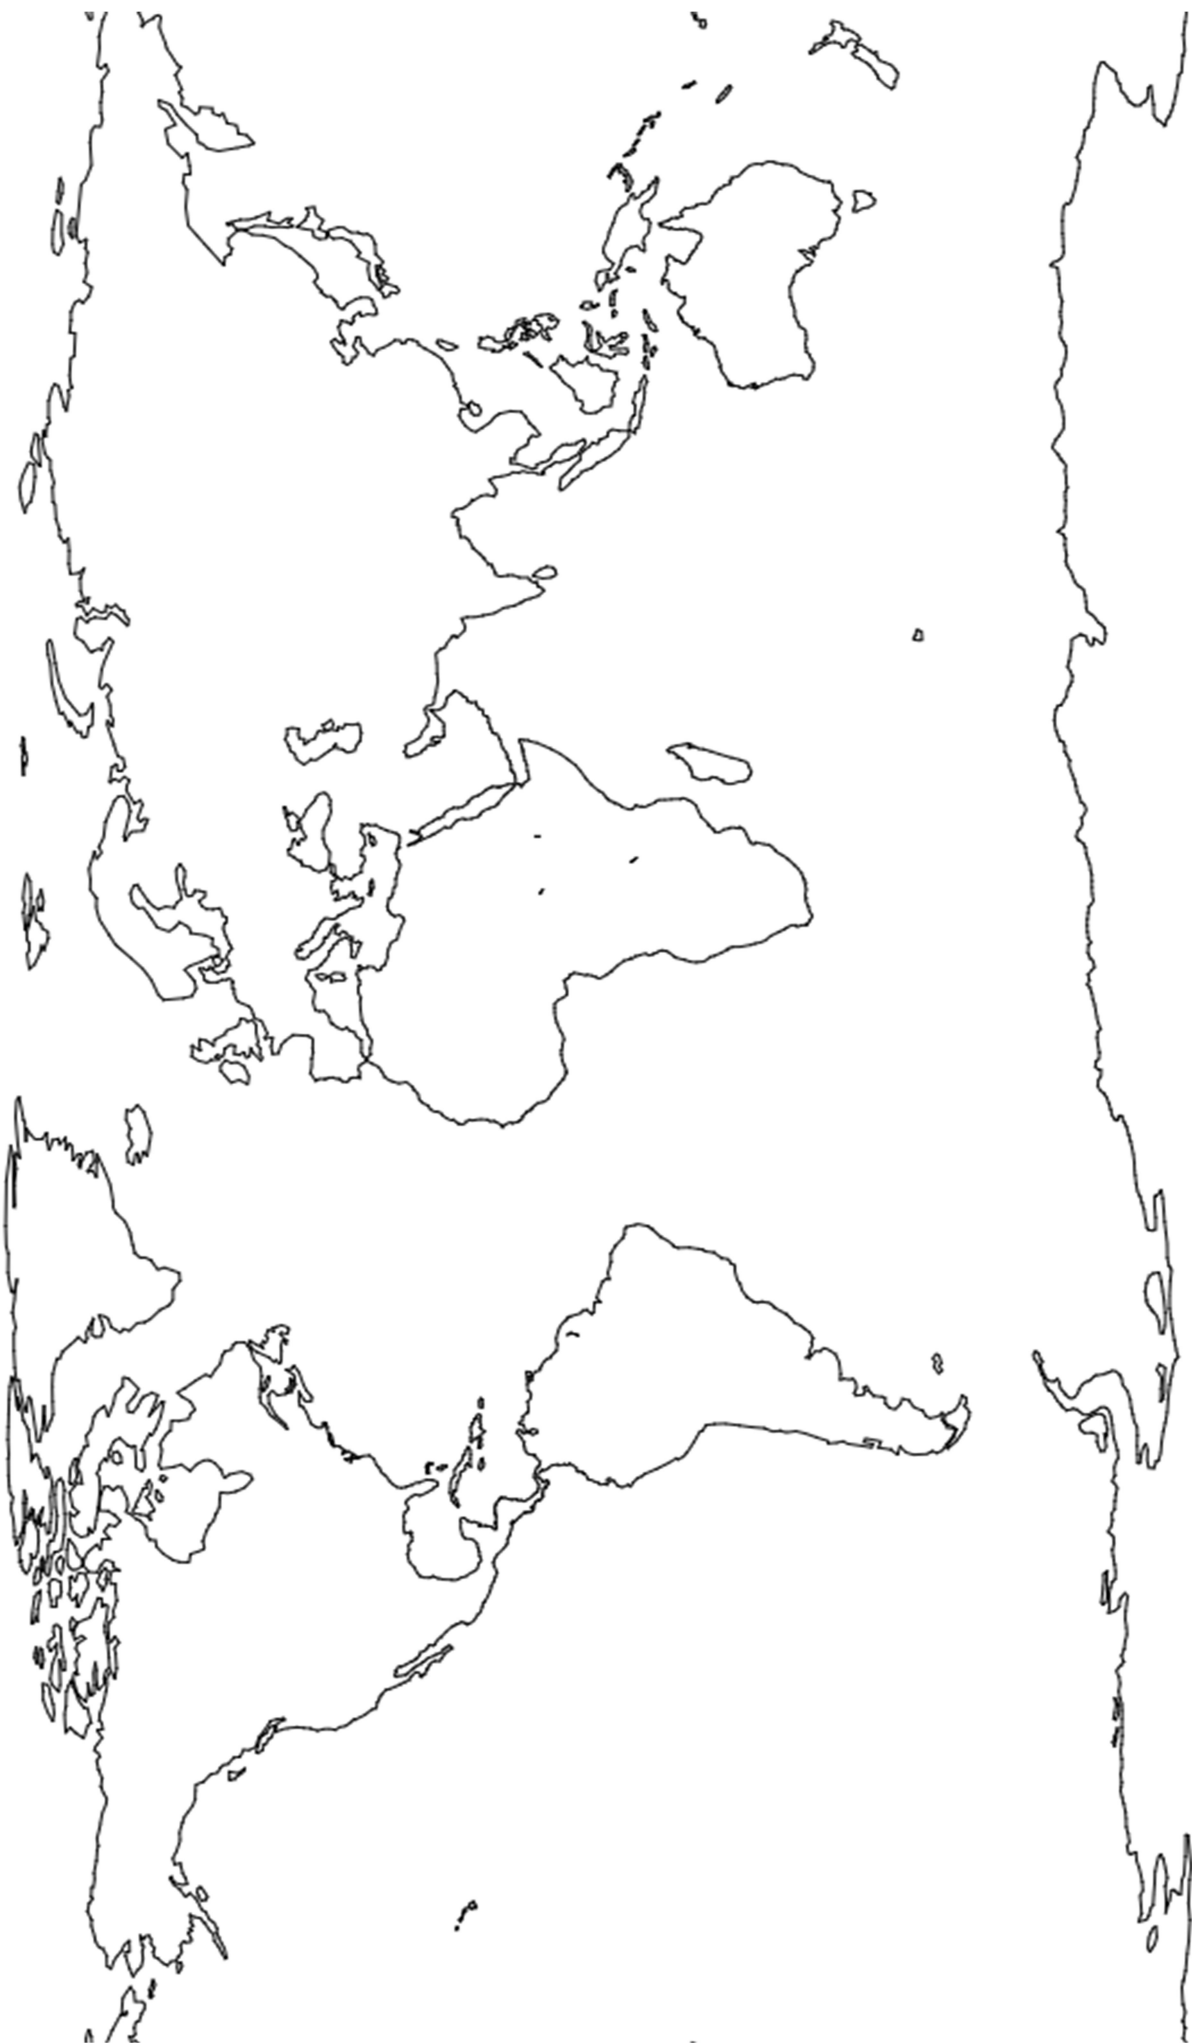

other independent territories in Asia and the Pacific. Firstly, the 'El Niño' phenomenon has devastated South America. Flooding and rising sea levels have covered a third of Amazonia and it became vital to sign an international treaty – the FAT Treaty. The Fresh Air Treaty or 'FAT' Treaty was signed last year by all countries to make South America a natural protected reserve. It has been a huge success even if HSRH Ivanka Trump refused to attend the International summit due to a golf tournament.

Concerning sub-Saharan Africa and all the other unmentioned or independent countries, it can be clearly seen that most have deplorable living conditions. Their respective populations are considered to be on a survival day-to-day lifestyle. All their hopes for a better future also depend on a successful five-year treaty between the four superpowers. They are known as the 'forgotten regions', an example is the Middle East which lost its oil-producing infrastructures and desalination installations during the war. Sub-Saharan Africa still maintains a steady flow of raw materials in spite of incessant warring ethnies, Banana Republics and military junta. The CFS, AGAFAM Alliance and Zhù Empire influences are considerable in these regions. A further consequence, many south-east Asian countries fear the Zhù Empire expansionism...all these states are holding their breath and awaiting the end of the summit. They are not represented in the summit.

EXTRA HELP: factors to consider when drawing-up propositions for an international treaty on renewable energies

1. The CFS and the AGAFAM Alliance want to make efforts in the future to modernize the 'Forgotten regions' with renewable energies. The Zhù Empire and Amvank are much less favorable.
2. The CFS, the AGAFAM Alliance, Amvank and the Zhù Empire all mistrust each other but negotiations are possible if the respective governments are willing to *'give and take'* a little.
3. The AGAFAM Alliance are reconsidering their options and strategies for renewable energies because of their territories' geographies and favorable climatic conditions, they need CFS technology.
4. The Zhù Empire invests huge amounts of capital in infrastructures along its Northern borders with the Forbidden North Territory, again probably with an interest in raw materials and rare metal extraction although this has been strongly denied by Zhù government officials.
5. Amvank has encountered considerable setbacks in Greenland where oil reserve expectations are disappointing causing an economic slump in Amvank. However, natural gas reserves are still consequent and uranium extraction continues. It has drawn up plans to continue and step up considerably raw material prospection in Antarctica.
6. The Zhù Empire has had important civil unrest in recent months because of a huge rise in the cost of living due to fossil energy prices. The Empire remains an important partner for any future treaty because of its population size and sheer economic strength even if it is a severe autocratic dictatorship. It needs to be reassured of the positive sides to democracy and freedom.
7. The CFS and the AGAFAM Alliance want to curb the Zhù Empire's desires to exploit the Forbidden North Territory and would like to see more democracy and freedom for the citizens of the Zhù Empire.
8. Recently accused of mass AI spying on an international scale, the AGAFAM Alliance needs to promote an open and more positive image in the next five years. All the other superpowers distrust the AGAFAM Alliance who has been known as untrustworthy in former international agreements. They must give solid assurance and guarantees of their honesty in future treaties or deals.
9. The CFS and the Zhù Empire want to fully prohibit Amvank's desire to control and exploit the totality of Antarctica.
10. Amvank needs qualified and unqualified workers in order to maintain raw material extraction and transformation. The two pandemics have weakened its population. It lacks the technology in renewable energies because of its unsuccessful investments in nuclear fusion technology which could, however, soon be a reality. It is a reliable partner in raw materials.
11. The CFS has also realized that the AGAFAM Alliance is spying on its recent renewable energy technologies. A treaty of 'technical' non-aggression needs to be organized.
12. Recent medical reports claim that the Forbidden Southern Territory is now Antax 39-free and could be re-inhabited.

Task 1.2 - Read the CONTEXT (pp. 13-15) and draw the limits of the CFS, the Zhù Empire, Amvank and the AGAFAM Alliance as well as the Forbidden Territories and Forgotten States. Take into account the future sea and ocean levels over the next 50 years (see map 1 on the previous page)

Task 1.3 - The New World Organization - Read the CONTEXT (pp. 13-15) and write here the specificity of each political entity in key words.

Tp 3

AMVANK	The Zhù Empire	The CFS	The AGAFAM Alliance
FORBIDDEN TERRITORIES & 'FORGOTTEN' STATES			

Task 2.1 – Identify the strengths & the weaknesses of your political entity. What environmental, technological, social, economic, political, technological and legal issues do you face ? Propose possible solutions to complete the scenario.

1. Weather & climate change, green & ethical issues, pollution, waste and recycling	 	
2. New technologies, AI, Information & Communication	 	
3. Population, liberties, constraints, lifestyle, immigration, social issues	 	
4. Labour conditions, energy costs, economic growth & resources	 	
5. Government type & policies for the future	 	
6. International regulations and standards, legal issues & crime, international conventions, human rights	 	

Task 2.2 - A Focus on Maps 1 to 10

(see the teacher's handouts)

UNDERSTAND INFO SEARCH

What do you notice ? What positive and negative trends that are shown on the maps affect your superpower and our planet in general ? What consequences & decisions do you foresee ? Write down your observations & ideas.

Map 1 – Sea Level Rise

Map 2 – World Renewable Energy Sources and Possibilities

Map 3 – Renewable energy sources statistics in 2022

Map 4 – World Potential for Renewable Energies in 2023

Map 5 – Environmental Displacement of World Population

Map 6 – Nuclear Energy & World Distribution of Uranium Deposits

Map 7 – World Population Pressure

Map 8 – World Seismic Activity

Map 9 – Basins, Deposits & Extraction

Map 10 – Access to Water

Consequences & decisions

Map 1

Map 2

Task 2.3 ADDITIONAL SOURCES OF INFORMATION & FACT FILE

Additional sources for your group & key facts/data for your ROLE :

Link 1 :

Link 2 :

Link 3 :

Task 2.4 UN/RELIABLE SOURCES OF INFO & CRAAP TEST

All speeches refer to 4 sources.

E.g.: "According to the *New York Times*, in September of this year, the unemployment rate rose to its highest level in 70 years.". In *Professor Smith's opinion*, the recent data has shown ...)

a) OK...I'll take a look at WIKIPEDIA...NO?

- *Wikipedia is simultaneously one of the most wonderful reference sources ever invented, a true gift of the Internet era, and also one of the most frustrating and easily misused.*
- *The best thing about Wikipedia is the reference material. It is a great place to start your research and a terrible place to end it.*

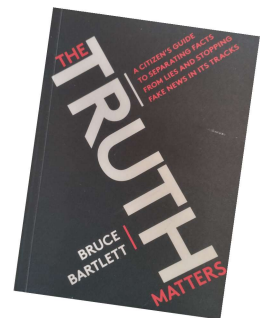

- *There are some uses for Wikipedia, however:*

1. Articles usually have a bibliography of **primary sources** which you can and should read instead of the Wikipedia article;
2. The most common or current **key terms** for a given topic will be used there.
3. On some pages, you can see the disputed areas of a topic – **both sides are presented**, not always equally fairly, but you can still see **the opposing points of view**. An example can be seen on the "Talk Page," for the Domestic Violence entry: http://en.wikipedia.org/wiki/Talk:Domestic_violence

b) When working with sources, it's crucial to ensure their reliability

TRUTH OR FAKE ? CAN THE INFORMATION FROM YOUR SOURCES BE TRUSTED ?

1. **Primary** sources are more reliable than secondary ones;
2. **Academic sources** of information tend to be more trustworthy because of peer review ;
3. **Libraries** are the gatekeepers of trustworthy information; almost all public libraries allow free online access to extremely valuable news and research databases;
4. **Numbers** must be put into context ; large numbers are often best expressed as percentages;
5. **The media** are often guilty of treating issues as if there were only two sides;
6. **Opinions** are not the same as reporting ; most opinions need to be checked for facts from reliable sources and supported with evidence ;
7. **Critical thinking** is the best defense against fake information.

(from Bruce Bartlett "The truth matters" 2017)

RELIABLE NEWS & STATISTICS SOURCES :

Google newspaper archives : news.google.com/newspapers

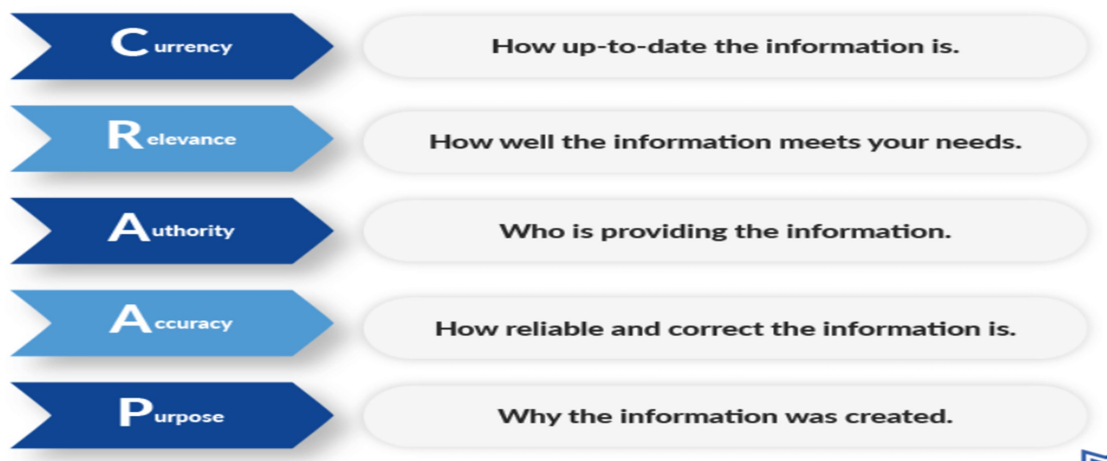

Google academic publications : scholar.google.com

Snopes : www.snopes.com

Science News : www.sciencenews.org

FactCheck : www.factcheck.org

Otherwise, use the 5 STEPS of the CRAAP test :

c) IDENTIFY THE 4 SOURCES OF INFORMATION FOR YOUR TALK

Locate **4 sources** that might be of use for your topic. These may include: books, magazines, journals, newspapers, radio, television and interviews (with experts or peers). Many of those types of sources listed can be found in their entirety on the WEB. It is acceptable if you find all sources on the WEB, but you must be able to verify the author and evaluate the reliability of every source. You may also use libraries to find sources that have not been digitized.

d) HOW TO QUOTE FROM THE SOURCES

You can indicate your attitude to the sources you cite by choosing specific verbs to refer to them. Don't just keep repeating "Smith says." There is a wide choice of such verbs in English. Here are some grammatical patterns to follow in using these verbs:

Pattern 1: *reporting verb* + **that** + *subject* + *verb*

acknowledge	admit	agree	allege	argue
assert	assume	believe	claim	conclude
consider	decide	demonstrate	deny	determine
discover	doubt	emphasize	explain	find
hypothesize	imply	indicate	infer	note
object	observe	point out	prove	reveal
say	show	state	suggest	think

- (a) Da Souza **argues that** previous researchers have misinterpreted the data.
- (b) Researchers **have demonstrated that** the procedure is harmful.
- (c) Positivists **find that** social disorders are exacerbated by class factors.
- (d) Singh **infers that** both states are essential.

Pattern 2: *reporting verb + somebody/something + for + noun/gerund*

applaud	blame	censure	criticize	disparage
fault	praise	ridicule	single out	thank

- (a) Smith **criticized** Jones **for** his use of incomplete data (OR **for** using incomplete data).
- (b) Both Smith and Jones **condemn** previous researchers **for** distorting the data.
- (c) Banting **thanked** Best **for** his contribution to the discovery of insulin.

Pattern 3: *reporting verb + somebody/something + as + noun/gerund/adjective*

appraise	assess	characterize	class	classify
define	depict	describe	evaluate	identify
interpret	portray	present	refer	view

- (a) Jones **describes** the findings **as** resting on irrefutable evidence.
- (b) Smith **identifies** the open window **as** a source of contamination.
- (c) Smith and Jones both **present** their data **as** conclusive.

e) MAKE 3 SENTENCES USING 3 DIFFERENT REPORTING VERBS FROM ABOVE

a)

.....

.....

.....

b)

.....

.....

.....

c)

WHAT'S A FACT FILE ?

A fact file is a clear and organised document that presents key information, facts, and data about a specific topic or scenario, usually based on research and written in a concise and easy-to-read visual format.

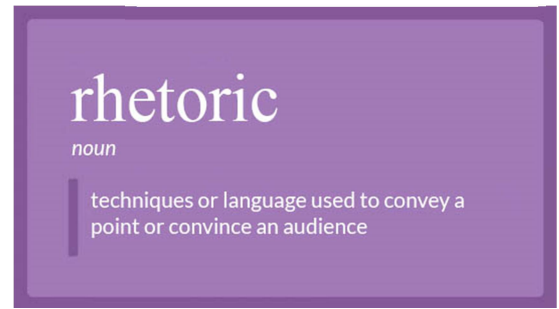

HOW TO CREATE A FACT FILE ?

To create a fact file gather information from reliable sources, making sure to cross-check facts, and select only the most relevant details such as key facts, definitions, statistics, and examples that relate to the scenario; organise your fact file clearly with a title, a brief introduction, main facts presented in bullet points, supporting data/statistics, and a short conclusion that links back to the scenario, while keeping the layout clean and easy to read; write everything in your own words to show understanding, avoid copying, and include a list of sources used.

Upload your individual FACT FILES on Moodle as a pdf **FACT_FILE_Last name_group.pdf** BEFORE TP5

10 rhetorical strategies for persuasion

"Rhetorical devices are words or word phrases that are used **to provoke a response** from a listener or reader and to persuade during communication. Rhetorical devices can be used in writing, in conversation or if you are planning a speech".

1. A rhetorical question

Can we really expect the world to keep peace amidst the impending global energy crisis?

2. Parallel structures

*Logic will get you from A to B, **imagination** will take you everywhere.*

3. Emotive language

***Imagine** being cast out into the street, cold, lonely and frightened.*

4. Contrast

*Facts are **many** but the truth is **one**.*

5. Sound patterns

*Alliteration: **Creating climate change causes catastrophes. Fossil fuel free future!***

6. The "rule of 3"

*I ask you: **Is this fair ? Is it just ? Is it right ?***

7. Repetition

***Evil** minds will use **evil** means.*

8. Description and Imagery (using metaphor, simile and personification)

*While we wait and do nothing, we must not forget that **the fuse is already burning**.*

9. Hyperbole (using exaggeration for effect)

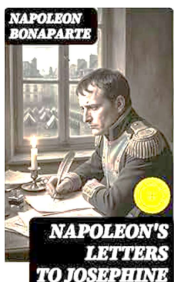

*While we await your decision, **the whole planet holds its breath**.*

10. Anecdote (using humour for more impact)

Two planets meet. The first one asks: "How are you?"

"Not so well", the second answered "I've got the Homo Sapiens."

"Don't worry," the other replied, "I had the same. That won't last long."

Letters are like **compressed speeches** — they contain **arguments, emotion, and persuasion** in concentrated form. Reading them aloud helps you learn **speech structure, rhythm, emotional appeal, and audience targeting**.

Listen to the letters & underline the rhetoric techniques Napoléon uses : https://www.youtube.com/watch?v=ObTqDkykJ_A
Practice reading a Napoleon's letter outloud.

Letters to Joséphine

Early 1796

So what is your strange power, incomparable Joséphine? One of your thoughts is poisoning my life, tearing my soul apart. I well know that if we argue I should deny my heart.
My conscience—you have seduced them; they are always yours.
I went to bed really angry. So you thought I did not love you? Whom then?
Ah, madam, have you really thought about it?
How could such a low feeling be conceived from a soul so pure?
I am still astonished—less so, however, than the feeling which, since I woke up, has led me without bitterness and effortlessly to your feet.
I give you three kisses: one on your heart, one on your mouth, and one on your eyes.

Later that same year – Naples

My life is a perpetual nightmare !
A presentiment of ill oppresses me.
I see you no longer.
I have lost more than life, more than happiness, more than my rest.
I am almost without hope !
I hasten to send a courier to you.
It will stay only four hours in Paris and then bring me your reply.
Write me ten pages. That alone can console me a little.
You are ill. You love me. I have made you unhappy. You are in delicate health and I do not see you ! That thought overwhelms me ! I have done you so much wrong that I know not how to atone for it.
I accuse you of staying in Paris, and you were ill there.
Forgive me, my dear. The love with which you have inspired me has bereft me of reason. I shall never find it again.
It is an ill for which there is no cure. My presentiments are so ominous that I would confine myself to merely seeing you—to pressing you for two hours to my heart, and then dying with you, Joséphine.
How can you remain so long without writing to me? Your last laconic letter is dated May the 22nd.
Moreover it is a distressing one for me. But I always keep it in my pocket.
Your portrait and letters are perpetually before my eyes.

One month later – Mantua

I have been without letters from you for two days !
That is at least the thirtieth time today that I have made this observation to myself.
You are thinking this is particularly wearisome, yet you cannot doubt the tender and unique anxiety with which you inspire me.
We attacked Mantua yesterday. We warmed it up from two batteries with red-hot shot and from mortars. All night long that wretched town has been on fire. The sight was horrible ... and majestic !
We have secured several of the outworks.
We opened the first parallel tonight.
I have summoned the courier. He tells me that he crossed over to your house and that you told him you had no commands.
Fie, naughty and dutiful, cruel, tyrannous, jolly little monster! You laugh at my threats, at my infatuation.
Ah! You well know that if I could shut you up in my breast, I would put you in prison there.

February 1797 – Bologna

Peace with Rome has just been signed. Not a word from you !
What on earth have I done to think only of you, to love only Joséphine, to live only for my wife, to enjoy happiness only with my dear one? Does this deserve such harsh treatment from her? **Write to me. Think of me. And love me.**
Yours ever,
for life.

Task 3.1 A Proposition of Policy Speech

This type of speech makes a persuasive argument about a course of action regarding a controversial topic of social or public concern. This speech requires you to use all that you have read and researched. You may be asking your audience to change long held beliefs and opinions.

*In general, you are persuading the audience that serious problems need attention (with evidence about its causes & effects), and that you have found possible solutions (it does **not** need to solve the problems entirely).*

*Your speech will take a position and make an argument about both a **problem and the solution**. You will use your opinion, yes, but it will have become an informed opinion, as a result of **your research and reading**.*

You must quote 4 outside sources to demonstrate your credibility.

Your speech will :

- 🔊 propose A PARTICULAR COURSE OF ACTION be taken
- 🔊🔊 ARGUE for or against solution(s)
- 🔊🔊🔊 include the words "MUST" & "NEED"
- 🔊🔊🔊🔊 include A CALL FOR IMMEDIATE CHANGE
- 🔊🔊🔊🔊🔊 ADDRESS YOUR AUDIENCE DIRECTLY 🗣️ **YOU**

USE THESE WORDS to express URGENCY, CONNECTION, REWARD & SURPRISE :

Words that convey urgency: <i>now, must (not), don't miss, latest, hurry, only (3 days left), today, tomorrow</i>	Words that create connection: <i>join, help, discover, create, come along</i>
Words that promise a reward for an effort: <i>quick, easy, instantly, immediately</i>	Words that promise a surprise: <i>surprising remarkable, amazing, astonishing, unbelievable</i>

Remember that one key element of persuasiveness is **credibility**: Napoleon is credible because he uses emotion, sincerity and authority. *Does the audience see you as a speaker who knows their material? Who is authentic?*

This is ETHOS (from Greek ἦθος « moral character »).

You can help the audience to see you as competent by doing research and demonstrating that research. The strongest arguments are those that are made with full knowledge of the issues, including the opposing points of view.

Task 3.2 Convince like Napoleon !

Classical speeches (from ancient rhetoric) often follow five parts:

1. **Exordium** – opening that captures attention
2. **Narratio** – background or context
3. **Confirmatio** – arguments or proof
4. **Refutatio** – response to objections
5. **Peroratio** – emotional conclusion / call to action

Napoleon's love letters to **Joséphine de Beauharnais** follow exactly this pattern. These letters are excellent rhetorical illustrations because they mix **persuasion, personal vulnerability, and authority**—skills that also appear in political speeches.

1. **Exordium - Emotional opening.** Purpose 🖋️ grab attention and create emotional connection.

"So what is your strange power, incomparable Joséphine? One of your thoughts is poisoning my life, tearing my soul apart."

Rhetorical techniques	Political parallel
- dramatic opening - emotional exaggeration - direct address ("Joséphine") Why it works: - Immediately establishes emotion and urgency. - Makes the reader feel important.	Speeches often begin with a powerful emotional statement. Example technique: - crisis framing - praise of audience - strong imagery.

2. **Narratio – Establishing the situation.** Purpose 🖋️ explain what is happening.

"I went to bed really angry. So you thought I did not love you?"

Rhetorical techniques	Political parallel
Here Napoleon explains: - a misunderstanding - his emotional state - the context of the conflict. Techniques used: - storytelling - personal confession - simple language.	In speeches this section often: - explains the problem - establishes the background of a political issue.

« What on earth have I done to think only of you, to love only Joséphine, to live only for my wife, to enjoy happiness only with my dear one? »

Rhetorical techniques	Political parallel
This section uses three key rhetorical devices : Repetition (Anaphora) <i>"Only... only... only..."</i> This creates rhythm and emphasis. Emotional proof He presents his feelings as evidence. Escalation Each phrase increases intensity: <i>think → love → live → happiness</i>	Political speeches frequently use the same technique to reinforce commitment.

4. *Refutatio* – Addressing doubt. Purpose ➡ respond to criticism or suspicion.

"Forgive me... I accuse you of staying in Paris and you were ill there."

Rhetorical techniques	Political parallel
Napoleon acknowledges: - he might have been wrong - he misunderstood her situation. Techniques: - apology - humility - self-criticism. Why this is persuasive: Admitting fault increases credibility (ethos) .	In political speeches this appears when leaders: - admit mistakes - acknowledge opposing views.

5. *Peroratio* – Emotional conclusion. Purpose ➡ leave a strong emotional impact.

"Write to me. Think of me. And love me."

Rhetorical techniques	Political parallel
- Short commands - Each sentence becomes stronger and more direct. - Rhythm Three short phrases create a memorable ending. Emotional appeal The request is clear and personal.	Political speeches also end with: - a call to action - an emotional summary.

Can you guess what the purpose of the additional rhetorical techniques is ?

- a) *"My life is a perpetual nightmare."* b) *"That wretched town has been on fire... the sight was horrible and majestic."* c) *"We attacked Mantua yesterday... I have been without letters from you for two days."*

PREPARE

PRACTICE

OTHER IMPORTANT GUIDELINES

- == Time: 12 – 15 minutes per team/3 min per student
- == Delivery: Extemporaneous
- == Mode: Persuasive
- == Quote 4 reliable sources DURING the speech
- == Show the use of 3 types claims & ethos, pathos & logos
- == A group's speech draft must be handed in before the day of the speech, BEFORE you may give your speech
- == Question time after each group's speech
- == A 2-minute group response per group, then debate time

NAMES _____ TP GROUP _____

Group's speech draft on Moodle **SPEECH_DRAFT_Last names_group.pdf** before TP 8

LANGUAGE FOCUS

Enriching your work

Once your work is correct – you can also improve the richness.

Use complex phrases.

Replace basic words with more precise ones (see Word Thesaurus or online thesaurus). Careful! Only use words you understand & know how to use grammatically!

LINK WORDS

Making a general statement	in general · generally speaking · on the whole · as a rule
Introducing something obvious	obviously · naturally · of course · clearly · doubtless
Introducing a cause/consequence	because · as · since · consequently · therefore · thus · hence · as a result · thereby
Giving additional information	and · not only ... but · as well as · in addition · furthermore · moreover · besides · apart from
Contrast	but · however · nevertheless · yet · although · (even) though · in spite of · despite · whereas · on (the) one hand ... one the other hand ..
Correcting something	actually · in (actual) fact · in reality
Clarification	for example · for instance · e.g. · that is to say · in other words · i.e. · such as · namely

MODIFICATION

Adjectives

Importance	important · significant · crucial · meaningful · relevant
Dimension	enormous · tremendous · huge · widespread small-scale · tiny · minute
Hierarchy	major · chief · leading · primary · foremost · outstanding common · typical · average · standard secondary · minor
Intensity	dramatic · striking · acute · sharp
Utility	appropriate · suitable · useful · reliable · efficient

ADVERBS

Essence	essentially · fundamentally · basically · on the whole
Manner	carefully · steadily · thoroughly · accurately · properly
Negation	hardly (any) · scarcely (any) · barely (any)
Degree	a little/bit · slightly relatively · quite · rather · fairly very · extremely · exceedingly
Approximation	nearly · almost · roughly · more or less · virtually · to a certain extent · partly totally · quite · entirely

Task 3.3 There are 4 types of delivery

How do I move towards a speech? I have the notes, I need to think about delivery (speaking/ saying the speech) and how to remember the speech!!

1/ MEMORIZATION

2/ READING FROM A PREPARED TEXT, WORD FOR WORD

3/ IMPROMPTU (Name, Explain, Support, Conclude)

4/ EXTEMPORANEOUS

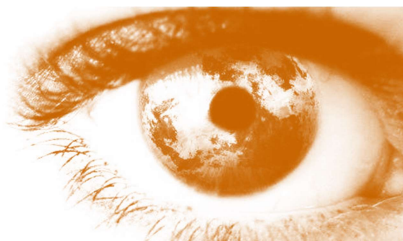

We need to choose number 4!

EXTEMPORANEOUS IS THE DELIVERY WE WILL USE IN MOST SPEECHES

Definition of EXTEMPORANEOUS: blends conversational and formal qualities, depends upon practice (like most worthwhile tasks), uses a system of notes to yourself, with some parts written out fully

It is the BEST delivery style to master, because it is: the most flexible, the most powerful, comprehensive, in that it uses elements of the other 3, allows for communicating complex ideas with full engagement with the audience with eye contact

Aristotle: "The eyes are the mirror of the soul."

Task 3.4 TAKE THE SEVEN STEP APPROACH TO EXCELLENT EXTEMPORANEOUS DELIVERY

1. With a highlighter, mark the KEY CONCEPTS (usually nouns and verbs).
2. Practice once (1st time) with this marked up paper. (the annotated script, remember pronunciation tips)
3. Transfer these highlighted words to either cue cards or cut and paste into a new document.
4. Practice again (2nd time) with BOTH the marked up paper AND new key concept cards or paper in your view. Focus on the new key concepts card more; but consult the old paper if you get stuck.
5. Add items to the new cards if you get stuck or need prompting. You might need more info on a card, a note to yourself to slow down, speed up, look up, repeat, etc.
6. Practice (3rd time) with these new, marked up cards. TIME yourself. If you err, continue. If the speech is too long or short, edit to meet time limits.
7. Practice (4th time). The next time you give the speech, your 5th time, will be the best delivery yet.

IMPORTANT:

1. Number your cards.
2. Use only one side; it is too confusing otherwise and cards are cheap!
3. Write largely.
4. Write clearly.
5. Key concepts only, except as noted below.

OFFICIAL NOTIFICATION OF PRESENCE OF CUE CARD CONSTABLE

YOUR CUE CARDS (or outline) WILL BE EXAMINED BEFORE YOU GO TO THE PODIUM. IF THEY HAVE EVERY SENTENCE WRITTEN OUT, WORD FOR WORD, YOU WILL BE GIVEN NEW BLANK CARDS WITH WHICH TO CONVERT TO EXTEMPORANEOUS.

This is an uncomfortable situation and should be avoided. When you get to the podium, you want YOUR cue cards that you've practiced with 4 times previously.

Therefore, make sure you write down only:

1. key concepts, not full sentences
2. full sentences ARE permitted in INTRO, CONCLUSION, LONG OR DIFFICULT QUOTATIONS
